## Skills and Technologies

- ReactJS • Redux • JavaScript • ES6+ • NodeJS • Express • MongoDB • HTML • CSS
- Flexbox • Grid • SASS • git • github • JSON • API • Microsoft Office

## Projects

### **Suay Resort** <https://suay-resort.netlify.app/>

MongoDB • Express • ReactJS • NodeJS • Redux • REST API • SASS

- Full Stack Proof of Concept (POC) multi-page website that utilizes CRUD functionality and created with the MERN stack.
- Room and booking data is stored within a MongoDB database which is then accessible from the client.
- Users can browse rooms and create bookings on selected dates.
- Users can view and delete their bookings by entering the provided confirmation code or email.
- Backend handles date collision's and notifies user's if a room is available or unavailable on the selected dates.

### **Bicycle Ecommerce website** <https://leocycles.netlify.app/>

MongoDB • Express • ReactJS • NodeJS • REST API

- Fullstack MERN Ecommerce website that utilizes CRUD.
- Users can add/remove and delete items from the shopping cart.
- A MongoDB database where the user can login/create an account and store items that are in the shopping cart.
- Google login functionality using Google OAuth.
- Users can use filters to narrow down the product listings.

### **JavaScript Weather Application** <https://modernweatherapp.netlify.app/>

JavaScript • HTML • CSS • API

- All-in-one weather application that fetches data from an external weather API.
- An autocomplete search bar that allows you to search for any city in the world.
- Built in map that shows the searched location.
- Current & daily forecast data with the ability to switch between celsius and fahrenheit.

### **ReactJS Pokedex** <https://reactjsnationaldex.netlify.app/>

ReactJS • CSS • Redux • API

- A Pokedex created with React that contains all 898 Pokemon displayed in a beautiful UI.
- An autocomplete search bar that allows you to search for any Pokemon.
- The ability to choose between different Pokemon forms (such as Charizard, Mega-Charizard-Y, G-Max Charizard, etc.).
- Shows Pokemon info such as height, weight, stats, Pokedex description, and evolutionary forms.

### **Qwixx JS** <https://qwixxjs.netlify.app/>

JavaScript • SASS • HTML

- 2 to 4 player luck and strategy dice game with all rules of the game enforced and contains rules for those who are new.
- Has a helpful guide to help you what you can do during your turn or to warn you if you are making an invalid move.
